Electrostatic Tester (colo-T-V2)

User manual

## Technical data:

Portable by 9V battery.
Product size is : L:500mm, Diameter: 46mm
Weight; 440g
High voltage test arrange:0-100KV

Instruction:

1.Connect the equipment ground wire to the high voltage equipment that will be under test.(please see below pictures show)

2.Point the button as picture show.

3. Press the gun trigger and let the gun electrode touch the metal ball then can read the output of voltage.

Remark:
The instrument panel digital display is the testing values (Note unit: KV).
